

Machine Operator/Machine Maintenance

Bridgewater Chocolate LLC is an award winning handmade confection manufacturing company, specializing in premium enrobed American style chocolates including Törtels, Toffee, Caramels, Peanut Butter Patties, chocolate covered nuts and fruit as well as a full line of Truffles.

We manufacture confections from scratch in our 25,000 sq. ft facility .

The channels of distribution include on-line sales, Bridgewater Chocolate LLC branded retail stores and wholesale outlets.

Do you want to take your skills as a Machine Operator/Mechanic and apply them to the chocolate industry? We have sophisticated chocolate manufacturing equipment which needs to be operated and maintained by a hands-on technician. Our equipment is in some instances strictly mechanical, while others use software for servo based operation.

Bridgewater Chocolate LLC is seeking a Machine operator who is willing to adapt his/her skills and to learn the art of making chocolate in combination with operating proprietary equipment; some with machine specific software.

You will be working side by side with our head chocolatier to set up production equipment such as enrobing- and molding machines and more. You will help with the tweaking and regulating of the machines while production is running as well as making sure machines are maintained properly. Maintenance includes daily, weekly and monthly tasks. Electrical, plumbing and mechanical skills are added value.

Compensation and Other details:

Full time - 40 hour work week

Paid Vacation, Holidays and Sick Days

401K profit sharing, health insurance benefits

Requirements:

At least 3 years experience in either Chocolate Manufacturing, other related manufacturing or Mechanical Engineering.
